

PROFESSIONAL SUMMARY

Principal DevOps Engineer with 15 years of experience designing, implementing, and managing enterprise-scale cloud-native platforms across Azure, AWS, and Google Cloud Platform (GCP). Expertise in Kubernetes (AKS, GKE, k3s), Terraform, OpenTofu, Jenkins, GitLab CI/CD, Docker, Helm, Infrastructure as Code (IaC), DevSecOps, Platform Engineering, and FinOps. Proven track record of architecting scalable CI/CD platforms, automating cloud infrastructure, optimizing cloud costs, strengthening security, and leading DevOps transformation initiatives. Experienced in mentoring engineering teams, driving operational excellence, and delivering highly available, secure, and reliable cloud solutions.

TECHNICAL SKILLS

- ✓ **Cloud Platforms**
Microsoft Azure, Amazon Web Services (AWS), Google Cloud Platform (GCP)
- ✓ **Containerization & Orchestration**
Kubernetes (AKS, GKE, k3s), Docker, Helm
- ✓ **Infrastructure as Code (IaC)**
Terraform, OpenTofu, Infrastructure Automation, Reusable Terraform Modules
- ✓ **CI/CD & DevOps**
Jenkins, GitLab CI/CD, GitHub, Argo CD, Maven, Ant, Release Management, Deployment Automation, Multi-Branch Pipelines
- ✓ **Platform Engineering & Automation**
Platform Engineering, CI/CD Platform Design, Infrastructure Automation, GitOps, Shell/Bash, Python, Groovy, YAML, JSON
- ✓ **DevSecOps**
SonarQube, Trivy, JFrog Artifactory, SAST, Vulnerability Scanning, Secure CI/CD
- ✓ **Monitoring & Observability**
Grafana, Looker, Logging, Alerting, Performance Monitoring
- ✓ **Identity & Security**
Azure Entra ID, SAML, JWT Authentication, RBAC, Secrets Management
- ✓ **Configuration Management**
Ansible
- ✓ **Version Control**
Git, GitLab, Bitbucket, SVN
- ✓ **Databases & Caching**
PostgreSQL, MySQL, Oracle, Microsoft SQL Server, MongoDB, Redis
- ✓ **Application Servers**
Apache Tomcat, JBoss, WildFly
- ✓ **Programming & Scripting**
Python, Bash/Shell, Groovy, Java, JavaScript
- ✓ **Methodologies**
Agile, Scrum, Jira, Redmine, Confluence, Wiki
- ✓ **Leadership**
Technical Leadership, Team Mentoring, Production Support, Incident Management, Root Cause Analysis (RCA), DevOps Transformation
- ✓ **AI for DevOps**
ChatGPT, OpenCode, Google Gemini, Claude AI, AI-assisted Automation

CERTIFICATIONS

- | | |
|---|----------|
| ✓ GCP Associate Cloud Engineer Certification. | Nov 2024 |
| ✓ GCP Professional Cloud DevOps Engineer Certification. | Dec 2024 |

ENTERPRISE CLOUD PLATFORM ENGINEERING, AUTOMATION & DEVSECOPS

Technologies: Azure, GCP, Terraform, OpenTofu, Jenkins, GitLab CI/CD, Docker, Kubernetes, Helm, SonarQube, JFrog Artifactory, Git, Kafka, NiFi

- ✓ Architected and standardized multi-cloud infrastructure across Azure and GCP using Terraform (IaC), delivering secure, scalable, and reusable infrastructure provisioning.
- ✓ Engineered enterprise CI/CD platforms using Jenkins and GitLab CI/CD, enabling automated build, testing, security scanning, artifact management, and multi-environment deployments.
- ✓ Designed and managed cloud-native platforms using Docker, Kubernetes, and Helm, improving application scalability, high availability, and deployment reliability.
- ✓ Implemented enterprise DevSecOps by integrating SonarQube, JFrog Artifactory, and automated quality gates, strengthening code quality, security, and release governance.
- ✓ Led platform modernization initiatives, including SVN-to-Git migration, Git workflow standardization, Big Data platform enablement (Kafka, NiFi, HDFS), cloud automation, monitoring, and Azure cost optimization (FinOps).

PROFESSIONAL EXPERIENCE

Organization : Smarbl Limited

Designation : Principal Engineer – DevOps

Period & Location : Jan 2026 to till date, Present Pune, India.

- ✓ Lead DevOps, Platform Engineering, and Cloud Infrastructure initiatives for enterprise cloud-native applications.
- ✓ Architect and manage Kubernetes platforms (AKS, GKE, k3s) and scalable cloud infrastructure across multiple environments.
- ✓ Design and automate Infrastructure as Code (Terraform/OpenTofu) and enterprise CI/CD pipelines using Jenkins and GitLab CI/CD.
- ✓ Implement DevSecOps practices by integrating SonarQube, Trivy, JFrog Artifactory, and security automation into CI/CD workflows.
- ✓ Drive cloud cost optimization (FinOps), operational excellence, platform reliability, and continuous service improvement through automation, governance, and engineering best practices.
- ✓ Mentor engineering teams, establish DevOps best practices, and drive continuous improvement across development and operations.

Key Achievements

- ✓ Reduced deployment time by 80% through end-to-end CI/CD automation and deployment standardization.
- ✓ Standardized reusable Terraform/OpenTofu modules, significantly accelerating infrastructure provisioning and ensuring consistency.
- ✓ Designed and implemented AKS backup and disaster recovery solutions using Azure Backup and managed disk snapshots.
- ✓ Built enterprise-grade multi-environment Jenkins pipelines, improving deployment reliability and release efficiency.
- ✓ Improved platform reliability by implementing Kubernetes health checks, automated rollback strategies, and proactive monitoring.

Organization : T-Systems ICT India Pvt Ltd

Designation : Senior Consultant (DevOps & Cloud Engineer)

Period & Location : Jul 2022 to Jan 2026, Pune, India.

- ✓ Designed and implemented Infrastructure as Code (IaC) using Terraform to provision and manage cloud infrastructure across GCP, Azure, and AWS.
- ✓ Architected GitLab CI/CD pipelines with Docker and managed GitLab Runners to optimize build performance, deployment automation, and resource utilization.
- ✓ Orchestrated Kubernetes workloads using auto-scaling, rolling updates, and service discovery to deliver highly available cloud-native applications.
- ✓ Implemented DevSecOps by integrating SonarQube, JFrog Artifactory, and automated quality gates into CI/CD pipelines.
- ✓ Designed Grafana dashboards for real-time monitoring and collaborated with Agile teams using Jira to improve operational efficiency and delivery.

Key Achievements

- ✓ Standardized multi-cloud infrastructure provisioning by developing reusable Terraform modules, improving deployment consistency across Azure, AWS, and GCP.
- ✓ Enhanced CI/CD efficiency through GitLab Runner auto-scaling and parallel job execution, reducing build times and optimizing infrastructure utilization.
- ✓ Strengthened software quality and security by integrating SonarQube, JFrog Artifactory, and automated quality gates into enterprise CI/CD pipelines.

- ✓ Increased operational visibility through centralized Grafana dashboards, enabling proactive monitoring and faster incident resolution.

Organization : CRISIL LTD

Designation : Senior Software Engineer (DevOps Engineer)

Period & Location : Feb 2018 – Jun 2022, Mumbai, India.

- ✓ Designed and automated CI/CD pipelines using Jenkins, Groovy, and Shell scripting to streamline application build, packaging, and deployment processes.
- ✓ Managed and optimized AWS cloud infrastructure (EC2, S3, RDS), ensuring high availability, scalability, backups, patching, and operational reliability.
- ✓ Automated application configuration and release management across Development, Test, UAT, and Production environments.
- ✓ Administered Git/SVN repositories, implementing branching strategies, version control best practices, and release governance.
- ✓ Containerized enterprise applications using Docker, supporting application modernization and scalable deployments.

Key Achievements

- ✓ Improved deployment efficiency by implementing fully automated Jenkins CI/CD pipelines, significantly reducing manual release efforts.
- ✓ Enhanced AWS infrastructure reliability through proactive monitoring, backup automation, and performance optimization.
- ✓ Standardized version control practices by establishing Git workflows, branching strategies, and release management processes.
- ✓ Accelerated application modernization by containerizing monolithic applications with Docker, improving portability and deployment consistency.
- ✓ Increased release quality and operational stability through automation, scripting, and continuous process improvements.

Organization : Pragmatix Services Pvt Ltd

Designation : Associate Software Engineer (Application Support Engineer)

Period & Location : May 2014 – Jan 2018, Mumbai, India.

- ✓ Managed SVN repositories, including code merging, branching, backups, and version control best practices.
- ✓ Automated application build, patch deployment, and release processes using build scripts and deployment automation.
- ✓ Provided production support by troubleshooting application and infrastructure issues, ensuring high system availability.
- ✓ Installed, configured, and maintained application servers, Big Data platforms, clusters, and environment configurations.

Key Achievements

- ✓ Streamlined software release processes by automating build and deployment activities, reducing manual effort and improving deployment consistency.
- ✓ Established version control best practices, improving source code management and release governance.
- ✓ Enhanced application stability through timely incident resolution, root cause analysis (RCA), and proactive production support.
- ✓ Successfully deployed and configured enterprise application servers and Big Data environments, ensuring reliable platform operations.

Organization : A Little World Pvt. Ltd

Designation : OPERATION EXECUTIVE - Technical Support (In database)

Period & Location : Jul 2010 – Aug 2013, Mumbai, India.

- ✓ Automated transaction file processing using Shell scripting, improving operational efficiency and reducing manual effort.
- ✓ Retrieved and analysed customer transaction data using MySQL, ensuring accurate settlement processing and issue resolution.
- ✓ Processed backend financial transactions and coordinated with banks, helpdesk teams, and business stakeholders to ensure timely fund settlements.
- ✓ Prepared operational and reconciliation reports to support daily business operations, compliance, and management reporting.

Key Achievements

- ✓ Improved transaction processing efficiency by automating repetitive operational tasks using Shell scripting.
- ✓ Maintained high accuracy in financial transaction processing and settlement activities, ensuring timely customer fund transfers.
- ✓ Reduced transaction discrepancies through effective troubleshooting and data validation using MySQL.
- ✓ Delivered accurate operational and reconciliation reports, supporting business decision-making and regulatory compliance.

EDUCATION

- ✓ Master of Computer Applications : Arunodaya University, 2020-2022, Mumbai, India.
- ✓ Bachelor of Computer Science : Shivaji University, 2006-2010, Mumbai, India.
- ✓ Java Technology (Core & Advance) : NIIT Institute, 2013, Mumbai, India.
- ✓ AWS (Amazon Web Services) : FCS Institute, 2020, Mumbai, India.

VIKRAM S. MULIK
